

Affinity Diagramming Session

Home page – should be able to go anywhere from anywhere “universal icons to profile/events/services/forum” Decide between feed / animation

Profile Page – Have a section where you can add to your feed. i.e add events, then see the events you’ve followed (Matt’s Idea) Your specific stuff for events / reviews/

DOG PAW IDEA – ties in with Matt’s history/activity feed to keep up with what youre interested in. View all events / reviews /

Services / Reviews – Search , filter by service, and filter by rating.

Icons to click and filter before you actually search first.

Implement directions prompt.

Events – Searching

Filter by hottest / closest / soonest

Invite people? Add events to your profile to show you are going. Be able to see who is going to events

Forums :

Similar to reddit. Save function, post function where it posts right to where you are searching

Messages in between users.

Filter by categories

Admin decisions :

No coding, we will just draw out storyboard for low fi, then use powerpoint to present, and then another program for Hi fi
